

Studio Pro 14 w/ Rampmaster Control Specific Content

Usage Guidelines:

- Primary images are included and are to be used as main image for the product.
- Primary images can be resized. For primary images, the white space around product can be cropped, but the image must but not be cut-off by cropping. For alternative images, suggested cropping to highlight a specific region of the kiln or oven may have already been prepared for use.
- If alternate images are included, then they are to be used as complimentary images for the product, but not as a primary image.
- Copy can be resized but not combined into a larger paragraph. If text is separated by paragraphs, please separate each paragraph as shown within the Product Specific Content.
- Whenever possible, features and options should be included in list form and not in paragraph form and using commas to separate each specific feature or option.
- Evenheat has the right to edit these guidelines in a manner that will assist brand consistency throughout the industry.

- Set-Pro w/ Express Mode
- Multi-Position Lid Vent
- Engineered Element Path

- Corner Mounting Technique
- Bench Top Operation
- Floor Stand Included
- Power Cord Exits to Rear
- Properly Sized Stand

Copy - Studio Pro 14 w/ Rampmaster Control Suitability

Like the Original Studio Pro, the design of the Studio Pro 14 was driven by the demands of glass work. Glass work is a fairly active process. It relies heavily on visual cues, opening and closing while firing, fast action and all sorts of movement. It's a lot of fun and the Studio Pro 14 only adds to the enjoyment. It doesn't hinder, compromise or get in the way. It just works well.

The Studio Pro 14 also works very well in the more traditional firing styles such as metal clays, low fire ceramics, enamels and china painting. While not as active as glass, these types of firings do require a kiln that's properly designed and built for use. Since the Studio Pro 14 is an Evenheat design, you know you're getting that as well.

The Studio Pro 14 will fire any ware up to 1650°F (900°C)
